EXPERIENCE

BI Support Analyst, 07/2024 - Current

Pigeon Education – Bengaluru, India

- Developed interactive Power BI dashboards to track key business metrics, enabling data-driven decisions across departments.
- Wrote and optimized SQL queries to extract and transform data from relational databases for accurate reporting.
- Built and maintained data models to ensure consistent and reliable reporting across multiple business functions.
- Performed data validation and ad-hoc analysis using Excel to support dashboard development and business reporting needs.

Data Analyst Consultant - Internship /Freelancer, 09/2025 - 03/2026

Rubixe-AI Solution Company – Bangalore

- Collaborated with stakeholders to deliver data-driven insights using Power BI, SQL, and Python, to support strategic decision-making.
- Designed Power BI dashboards using DAX and Power Query to visualize KPIs, trends, and business performance metrics.
- Built data models and ETL pipelines using SQL and Python to extract, clean, and transform data from multiple sources.
- Performed exploratory data analysis (EDA) using Excel and Python to uncover trends, improving business outcomes.
- Delivered data storytelling presentations to senior stakeholders, translating complex insights into clear business recommendations.

Operations Analyst – Digital Finance, 08/2023 - 07/2024

BYJU's - The Learning APP – Bengaluru, India

- Managed account and payment data to ensure the timely resolution of overdue accounts.
- Prepared operational and financial reports to support decision-making.
- Streamlined processes by documenting workflows and training team members.
- Analyzed trends and provided insights to support data-driven decisions.
- Conducted audits to maintain data accuracy, and operational integrity.

PROJECTS

Retail Profitability & Operations Intelligence

- Designed interactive dashboards and BI reports analyzing \$578K revenue and \$319K profit using Power BI, DAX, and Excel.
- Developed and tracked KPIs and performance metrics including profit margin, lead time, defect rate, and revenue vs. cost, providing strategic insights for business decisions.
- Evaluated supplier and vendor performance, identifying high-risk vendors and implementing cost optimization initiatives.
- Performed data-driven analysis of shipping costs vs. revenue to improve logistics efficiency, operational processes, and profitability.

Customer Purchase Behavior Analysis

- Developed interactive Power BI dashboards analyzing \$148K total revenue and \$3K average revenue, with category- and payment-level insights.
- Performed customer segmentation by age, gender, and payment method, identifying high revenue segments (Female: \$98K vs Male: \$50K).
- Built payment method and age-wise revenue analyses, highlighting Cash (45%) dominance and top revenue-generating age groups.
- Designed DAX measures for KPIs, including revenue aggregation, category contribution, and payment distribution, with drill-down slicers for dynamic reporting.
- Delivered actionable insights to optimize targeted marketing, customer segmentation, and payment channel efficiency.
